

## SAN06 Pain

### Objectius

---

That course provides you with concise information about **pain**.

The training activity contains four units and after working through it you will:

- Understand the most common types of pain, their signs and symptoms and how they can be treated.
- Have learnt about the different types of pain relievers available OTC.
- Know which questions to ask and when to refer customers to the pharmacist.
- Be able to give advice to customers suffering from different types of pain.
- Be able to interpret an OTC painkiller's Patient Information Leaflet (PIL).

To get the learning objectives you will have to do the proposed activities as directed by the teacher.
