

## Help bees in Sabadell

### Objectius

1. Justify the essential role of bees in our world.
2. Exemplify threats to honeybees in our neighbourhood.
3. Create a campaign in defense of honeybees.
4. Investigate and share tips to help bees in our district.
5. Cooperate with the members of our group to achieve our goal .

### Descripció de la proposta

After reading some news in the newspaper about the Honeybees in danger in Catalonia, we decided to build a PBL project around the driving question How we can help bees in Vallès Occidental. We want our pupils be aware of the importance of honeybees in our lives. The honeybees population decreased between 40% to 60% every year, and they are a very important part of our ecosystem. As pollinators, honeybees are a very important factor to get our food, because a 30% of our crops and a 90% of wild plants depend on them. Honeybees depend on plants as much as plants depends on bees, and without honeybees a 1/3 of our food disappears. The fact is honey bees population is in a deep crisis for different reasons, that when it happens at the same time produces a decrease of honey bee population.

### Aspectes didàctics i metodològics:

CLIL Methodology.

### Recursos emprats.

Quizlet, vídeos and creation of T-shirts.

### Continguts, competències i processos que es treballen de forma destacada

Area of social and natural science

Current world dimension

- Most popular social issues
- Biodiversity and sustainability
- Continuity and change
- Economy and sustainability
